

The research world is changing: international collaboration is no longer an option, but is the essential ingredient of success for individuals and organisations. France and Australia offers an enormous range of opportunities for scientists and technologists seeking excellence. FEAST-France can help build successful collaborative research initiatives.

- By Highlighting and promoting successful French-Australian research, FEAST-France raises awareness of the benefits of collaboration, educates the communities about prospects, and informs policy debates.
- Successful international collaboration needs high level planning, sustained commitment, and new sorts of understanding. FEAST-France advises organisations and researchers on strategies, processes and options.
- FEAST-France is a catalyst, bringing together key groups to develop new initiatives, share experiences, and learn about ways of increasing collaborative activity between Australia and France.
- Knowledge of national and international priorities and programmes and key actors is critical for establishing sustainable collaborative programmes. Funding of projects takes time and commitment. FEAST-France provides briefing and guidance on many opportunities and key information resources.

Building the French-Australian Research Community

The FEAST-France Network has been established to:

- Highlight existing bilateral S&T cooperation between France and Australia
- Improve this cooperation through identifying, supporting and strengthening linkages and cooperative ventures between France and Australia Networking

FEAST-France : French Australian research network

What is FEAST-France?

FEAST-France is a research network animated by the French Embassy in Australia that has been established to highlight, promote and facilitate research collaboration between France and Australia in all disciplines.

By supporting and instigating new researchers-led activities, providing information and guidance, and developing forums for interaction, FEAST-France aims to reduce the barriers to cooperation, and to assist researchers and groups wishing to engage.

What FEAST-France can do for you?

FEAST-France is a catalyst for French Australian research projects. Organisations or individuals undertaking (or just considering) collaborative research can access information, receive practical assistance, be involved in networks and create or take advantage of opportunities including workshops, seminars and conferences.

Why you should register?

You will get most from FEAST-France by registering on our website www.ambafrance-au.org/science. As a registered member you will:

- Receive targeted information in your area of interest, funding updates and other services,

- Have privileged access to the FEAST-France forum: www.feastfrance.org
- Receive our fortnightly and bimonthly newsletters

Who should join?

- Researchers participating in projects with French partners
- Researchers considering joint projects with French researchers
- Research managers, particularly those looking for up-to-date information on French research
- Those responsible for providing advice on French Australian relations
- Anyone with an interest in French-Australian S&T, Humanities and Social Sciences, R&D

www.ambafrance-au.org/science

- A portal to French-Australian collaboration
- Helpdesk services through forums : www.feastfrance.org
- Information on sources of research funding and fellowships
- Networks of researchers sharing information and experiences
- Documentation and promotion of existing collaboration
- Knowledge-base of France research system
